DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 21-40 and 42 rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-22 of U.S. Patent No. 6,616,498. The claims of the instant application recites most of the elements of the patented claims except for a stationary element. However, it would have been obvious to delete the feature from the bubble generating assembly in the patent for the purpose of making the bubble generating assembly more economical to produce.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Application/Control Number: 10/655,842

Art Unit: 3725

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 23-25, 27, 28, 31, 32, 38 and 40 are rejected under 35 U.S.C. 102(b) as being anticipated by Baker & Noonan (US Patent 185,279) or Bradshaw (US Patent 660,485) or Gilchrist, Jr. (US Patent 2,393,039) or Limber (US Patent 2,560,582).

The device of Baker & Noonan, Bradshaw, Gilchrist, Jr., or Limber read on the claimed limitations including a housing (a, 5, 10, or 10, respectively), a trigger mechanism (f, 47, 48 or 36), a bubble generating ring (d, 22, 31 or 30), means for delivering (c, 24 and 40, 28 or 32), a link assembly (b, 20, 46 and 48, or 86), a motor (The Examiner takes the position that P' of Baker & Noonan acts as a spring motor when returning the lever to its position), an air generator (e of Baker & Noonan), a gear system (fig 1 of Baker & Noonan), a container and tubing (24 and 40 of Bradshaw). It should be noted that the ring of Baker & Noonan and Bradshaw is moved in a curved movement when moved toward containers o and 24, respectively.

Allowable Subject Matter

Claims 26, 29, 30, 33, 34-37 and 39 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 42 is allowed.

Art Unit: 3725

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bena Miller whose telephone number is 571.272.4427. The examiner can normally be reached on Monday-Friday.

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
